Hazing at Annapolis.

DISGRACEFUL BEHAVIOR BY CADETS AT THE NAVAL ACADEMY. There has been a new and serious outbreak of hazing in the United States Naval Academy. On Saturday last, writes a correspondent, a number of first- and third-class men were engaged in some petty hazing at the old quarters. One fourth-class man was stood "In capite" and another was unceremoniously "fired" through a window, and they were waiting for another victim when a cadet named craig, of Illinois, entered. He was promptly saluted and told by a third-class man to stand on his head. This he refused to do, claiming that the third class had no right to haze, never having been hazed themselves. Several first.class men then approached and tried to compel him to execute the manœuvre, but he escaped into a room, where he was followed by the crowd, who attempted to catch him. In the confusion the light was put out and Craig managed to give one of his torment-ors several effectual blows with a pair of kates which he carried. He then escaped outside.

The first-class men, however, laid their plans, and as Craig came out from supper he was jumped upon by six or eight cadets, one six-footer being quite conspicuous in the cowardly attack. Craig, by the way, is not more than two feet seven inches high. He would probably have suffered severely had not several fourth-class men opportunely arrived to take part. This soon became a general melie in the new quarters. It was finally stopped by the officer in charge and the combatants were separated. The first class now vow vengeance on the fourth class and Craig in particular, and some lively fights will probably follow. What measures the authorities will take is as yet unknown, but an investigation will probably follow, and it will be made pretty ot for the upper-class men who took part. The only thing regretted by the fourth-class men is that Craig did not severely injure some of his assaitants.

Pretty Badly Mutilated.
A desperate fight between two drunken megroes occurred in Weldon, N. C., Tuesday night. One of the parties had his skull, over the right eye, fractured by a lick from a two-pound weight, and both arms broken, about the wrists, and was otherwise badly mutilated. Pretty Badly Mutilated.

Dr. Moffat's Ammoniaphone.

[From the Pall-Mall Gazette.] A very remarkable discovery is reported on the authority of a Fellow of the Royal Meteorological Society, to which the aften-tion both of the Faculty and of the Society cannot be too speedily directed. Dr. Car-ter Moffat, cousin of the late Dr. Robert Moffat, claims to have invented, after nine years' study, an instrument known as the ammoniaphone, which contains an absorbent material saturated with peroxide of hydrogen combined with a desired of hydrogen combined with condensed ammonia and other ingredients, through which a current of air is drawn into the lungs. This is said to be in reality a highly concentrated artificial Italianized air, in an extremely portable condition. Dr. Car-ter Moffat's voice was originally very weak, harsh, and destitute of intonation. By the use of the ammoniaphone it has now become a pure tenor of extraordinary range. He noticed that after experimenting on himself for only fourteen days an expansion of the chest took place to the extent of over half an inch, with a feeling of increased lung space and power of voice, which has since been maintained. Experiments have been made upon choirs Scotland with extraordinary results. there are a good many choirs in England, to say nothing of the opera companies, which stand in great need of improvement, the ammoniaphone is certain to be in great demand.

# A Munificent Dividend.

In 1876 the Miners' Trust Company Bank, of Pottsville, Pa., failed, with ilabilities amounting to over a million and a quarter of dollars. Tuesday ex-Judge Hobart filed the report of an audit of the accounts of The. Madden and H. C. Russell, the assignees, finding that they have in band for distribution \$42,235.92, sufficient to pay the creditors 3.080 per cent. of their claims. He recommends, however, that the dividend of the Huntzingers, who were the virtual managers of the bank, and who had big deposits to their credit in it, be retained, as numerous suits are pending against them to recover pro-perty alleged to have been bought with the funds of the bank and put in their own names.

Sales of the design is to obtain the greatest possible efficiency in the steam-heating surfaces. In order to effect this, the tubes have a helical twist given them, which does not interfere with the ease with which they may be cleansed, but which causes greater impingement of the gases against the tubes walls, and gives more freedom for expansion than straight tubes.

PHILADELPHIA, PA., September 6, 1882.

Hop Bitters Company : I am seventy-four years old, have lived thirty. our years in Philadelphia, and well known among Germans. I have been troubled twelve years wilo white swelling on my right foot, and getting worse every year, and very painful, and breaking out in hot weather. I consulted several doctors and they told me it was incurable, and I would have to take it with me in the grave. Some time ago I lost my appetite, was costive, had headache and fever; in fact, was very sick. I saw in the German Democrat that Hop Bitters was what I needed. I got a bottle, took it one week, and was as well again as ever, and to my greatest surprise. right from the first my swelling went down grad-ually, and I taking another bottle, got entirely well of it. The wife of my neighbor had two such swellings on her legs, and three bottles cared her I think this is a great triumph for your bitters.

STIPPSHILL. IND., November 18, 1881 Dear Sirs: I have read so much about Hop Bit ters, and always being afflicted with neuralgia weakness, diseased stomach, never having much health, I tried a couple bottles; it has trengthened and beiped me more than any medicine or doctor. I am now on my third bottle, and am thankful that it has helped me. I will advise that are afflicted to give it a trial. LUCY VAIL.
